PROFILE

I am a passionate B.Tech CSE (AIML) student with strong interest in AI, machine learning, and IoT. I build real-world projects like fake news detectors and smart dustbins to solve practical problems. Skilled in Python, C, and Arduino basics, I actively seek internship opportunities to gain hands-on experience and grow.

EDUCATION

Brainware University *West Bengal, India*

B.Tech in Computer Science & Engineering (AI ML) 2024 – 2028

- Strong foundation in Python, C Programming, Data Structures & Algorithms

Coursework: Machine Learning, Engineering Chemistry, Mathematics, Data Structures, C Programming

SKILLS

Programing Language: Html & CSS, Java Script, Java, SQL, Python, C

Technical: Node.JS, Statistics, ETL, Data Visualization, AI Automation, Machine Learning, NLP

Tools: Git, Excel, N8N.

CERTIFICATIONS

- Complete Machine Learning With Real-World Deployment *(link)*
- *Python For Beginners Course In-Depth (link)*

PROJECTS

AI-Based Fake News Detector

Personal Project – 2025

• Built a machine learning model to detect fake news using NLP techniques.
• Collected and preprocessed datasets for model training.
• Applied classification algorithms and evaluated model accuracy.
• Implemented text processing and prediction workflow.

Tools Used: Python, Scikit-learn, Pandas, Jupyter Notebook

Smart Dustbin (IoT Project)

Science Exhibition Project – 2025

• Designed an automatic dustbin using Arduino, ultrasonic sensors, and servo motors.
• Programmed the system to detect human presence and automatically open/close the lid.
• Demonstrated practical implementation of embedded systems and sensor integration.

Technologies Used: Arduino, Ultrasonic Sensor, Servo Motor

ACHIEVEMENTS

- Awarded **Best Minor Project**.
- Secured **Runner-up position** in Intra College Coding Competition among 2000+ participants.
- Selected participant in the **28th National Science Exhibition** for presenting an IoT-based Smart Dustbin project.
